Schemas

AddressRequestDTO Collapse all **object**

- Address Request DTO
- addressLine1* Expand all **string**
- addressLine2 Expand all **string**
- landmark Expand all **string**
- city* Expand all **string**
- state* Expand all **string**
- country* Expand all **string**
- postalCode* Expand all **string**

AddressEntity Collapse all **object**

- Address Entity
- addressId Expand all **integer** **int64**
- addressLine1 Expand all **string**
- addressLine2 Expand all **string**
- landmark Expand all **string**
- city Expand all **string**
- state Expand all **string**
- country Expand all **string**

postalCode > Expand all **string**

default **boolean**

ApiResponseString ^ Collapse all **object**

Generic API Response wrapper

success > Expand all **boolean**

message > Expand all **string**

data > Expand all **string**

timestamp > Expand all **string** **date-time**

RegisterRequestDto ^ Collapse all **object**

Registration Request Payload

name* > Expand all **string**

email* > Expand all **string**

password* > Expand all **string**

ApiResponseVoid ^ Collapse all **object**

Generic API Response wrapper

success > Expand all **boolean**

message > Expand all **string**

data > Expand all **object**

timestamp > Expand all **string** **date-time**

LoginRequestDto ^ Collapse all **object**

Login Request Payload

email* > Expand all **string**

password* > Expand all **string**

ApiResponseLoginResponse ^ Collapse all **object**

Generic API Response wrapper

success > Expand all **boolean**

message > Expand all **string**

data > Expand all **object**

timestamp > Expand all **string** **date-time**

LoginResponse ^ Collapse all object

Login Response Payload

token > Expand all string**type** > Expand all string**email** > Expand all string**role** > Expand all string**name** > Expand all string**UpdatePasswordDTO** ^ Collapse all object

Update Password Request Payload

oldPassword* > Expand all string**newPassword*** > Expand all string**UserEntity** ^ Collapse all object

User Entity

id > Expand all integer int64**email** > Expand all string**name** > Expand all string**phoneNumber** > Expand all string**provider** > Expand all string**providerId** > Expand all string**role** > Expand all string**adresses** > Expand all array<object>**createdAt** > Expand all string date-time**verified** boolean
