⌵
- GET

/api/inventory/check Check stock availability

⌵

Schemas

⌵

ApiResponseVoid ⌵ Collapse all object

success boolean

message string

data any

timestamp string date-time

BookRequestDTO ⌵ Collapse all object

Request object for creating or updating a book

title ⌵ Collapse all string

Title of the book

Example="The Great Gatsby"

author ⌵ Collapse all string

Author of the book

Example="F. Scott Fitzgerald"

isbn ⌵ Collapse all string

Unique ISBN of the book

Example="978-0743273565"

description ⌵ Collapse all string

Detailed description of the book

publisher ^ Collapse all **string**
Publisher name
Example="Scribner"

category ^ Collapse all **string**
Category of the book
Example="Fiction"

genre ^ Collapse all **string**
Genre of the book
Example="Classic"

price ^ Collapse all **number** **double**
Price of the book
Example=15.99

stocks ^ Collapse all **integer** **int32**
Available stock count
Example=100

rating ^ Collapse all **number** **double**
Current rating (1-5)
Example=4.5

publishedDate ^ Collapse all **string** **date**
Publication date
Example="1925-04-10"

coverImage **string** **binary**

ApiResponseListUserBookResponse ^ Collapse all **object**

success **boolean**

message **string**

data ^ Collapse all **array<object>**

Items ^ Collapse all **object**
Response object representing book details for end users

- id** **integer** **int64**
- title** **string**
- author** **string**
- isbn** **string**
- genre** **string**
- publisher** **string**
- price** **number** **double**
- rating** **number** **double**
- description** **string**
- coverImageUrl** **string**
- publishedDate** **string** **date**

```
stock integer int32
timestamp string date-time
```

UserBookResponse ^ Collapse all object

Response object representing book details for end users

```
id integer int64
title string
author string
isbn string
genre string
publisher string
price number double
rating number double
description string
coverImageUrl string
publishedDate string date
stock integer int32
```

ApiResponseUserBookResponse ^ Collapse all object

```
success boolean
message string
data ^ Collapse all object
Response object representing book details for end users
```

```
id integer int64
title string
author string
isbn string
genre string
publisher string
price number double
rating number double
description string
coverImageUrl string
publishedDate string date
stock integer int32
timestamp string date-time
```

AdminBookResponse ^ Collapse all object

Response object representing book details for administrators

```
id integer int64
title string
author string
isbn string
genre string
publisher string
price number double
rating number double
description string
coverImageUrl string
coverImageKey string
publishedDate string date
stock integer int32
```

ApiResponseListAdminBookResponse ^ Collapse all object

```
success boolean
message string
data ^ Collapse all array<object>
  Items ^ Collapse all object
    Response object representing book details for administrators
      id integer int64
