GET /api/payments/order/{orderId} Get Payment by Order ID

GET /api/payments/all-payments

Schemas

PaymentRequestDto ^ Collapse all **object**

Data Transfer Object for payment request

orderId > Expand all **integer** **int64**

amount > Expand all **number** **double**

currency > Expand all **string**

PaymentIntentResponseDto ^ Collapse all object

```
paymentId integer int64
clientSecret string
status > Expand all string
```

PaymentResponseDto ^ Collapse all object

Data Transfer Object for payment response

```
id > Expand all integer int64
orderId > Expand all integer int64
paymentIntentId > Expand all string
amount > Expand all number double
currency > Expand all string
status > Expand all string
```

Pageable ^ Collapse all object

```
page integer ≥ 0 int32
size integer ≥ 1 int32
sort > Expand all array<string>
```

PagePaymentResponseDto ^ Collapse all object

```
totalPages integer int32
totalElements integer int64
pageable > Expand all object
size integer int32
content > Expand all array<object>
number integer int32
sort > Expand all object
numberOfElements integer int32
first boolean
last boolean
empty boolean
```

PageableObject ^ Collapse all object

```
paged boolean
```

```
pageNumber integer int32
```

```
pageSize integer int32
```

```
offset integer int64
```

```
sort > Expand all object
```

```
unpaged boolean
```

SortObject ^ Collapse all object

```
sorted boolean
```

```
empty boolean
```

```
unsorted boolean
```
